

Smart Student Group Project Management System

User Manual

This user manual explains how to use the Smart Student Group Project Management System. The system helps students manage group projects, tasks, files, and contributions efficiently.

1. User Registration

Users can create an account by entering their name, email, and password on the registration page. After submitting the form, the account is created and ready for use.

2. User Login

Registered users can log in using their email and password. Upon successful login, the user is redirected to the dashboard where project activities are displayed.

3. Dashboard Overview

The dashboard provides an overview of project progress, including task statistics, recent activities, and group information. Users can monitor overall performance from this section.

4. Group Management

Users can create a new group or join an existing group using a unique code. Group leaders can manage members and assign roles within the group.

5. Task Management

Tasks can be created, updated, and organised into workflow stages such as 'To Do', 'In Progress', and 'Done'. Users can assign tasks, update their status, and track progress easily.

6. File Management

Users can upload, view, and manage files within the system. Files can be linked to tasks, allowing easy access and centralised storage of project resources.

7. Contribution Tracking

The system tracks user contributions based on completed tasks and uploaded files. This helps evaluate individual performance and ensures fair participation.

8. Reports and Analytics

Users can view reports and analytics that summarise project performance. This includes task completion rates and contribution statistics.
